

BENTOSTAB™ GRANULÉS

CLARIFICATION - FINING OF MUSTS

Activated sodium bentonite, granulated, highly deproteinising (hydrated alumina silicates belonging to the montmorillonite group)

➤ OENOLOGICAL APPLICATIONS

The formulation of **BENTOSTAB™ GRANULÉS** offers the following advantages:

- Simpler and safer in use
- Better dispersion
- Extremely high deproteinising strength (85%)
- Very good lees settling (good clarifying power)
- Preserves the aromatic intensity of wines

➤ INSTRUCTIONS FOR USE

Pour **BENTOSTAB™ GRANULÉS** into 10 times its weight in water, stirring vigorously to avoid lumps. Leave the suspension to swell for 6 to 24 hours, stirring every 6 hours. Stir vigorously to obtain an homogeneous preparation before incorporating into the tank during a pump over to homogenise it.. The use of hot water (50°C) is recommended to optimise rehydration.

➤ DOSE RATE

- 20 g to 80 g/hL on must.
- 20 g to 50 g/hL on wine.

The dosage should be based on the protein instability of the wines, refer to the protein stability tests carried out in the laboratory.

➤ PACKAGING AND STORAGE

- 1 kg, 5 kg, 25 kg

Store in a dry, odourless environment which is well ventilated at a temperature of between 5 and 25°C. Once opened, the product must be used quickly.
