New bending process

Steam bending of the staves, made by us in a new cabin specially dedicated to this operation.

NEW

Front view

DIMENSIONS

- Length: 1,35 m
- Bilge: 1,28 m
- Head: 1,15 m
- Total height of the presented model: 1,67 m

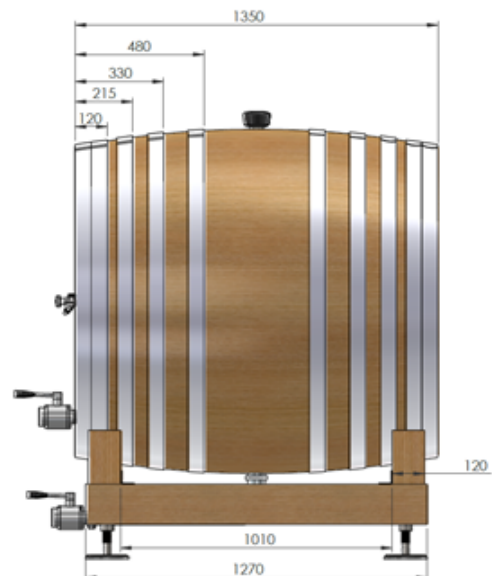

SENSORY BENEFITS

Followed by a light intensity fire bousinage, this new process of steam bending allows :

- To privilege the tension of your wine (structure),
- To bring aromatic freshness,
- To limit the woody and toasted notes.

SEGUIN MOREAU EQUIPMENT

- Connected drain (\varnothing 51 mm) (see specific data sheet)
- 10 galvanized steel circles with metallic grey paint
- Oval door assembled in sandwich (U-shaped frame)
- Butterfly ball valves racking and draining \varnothing 40 Macon
